

Utimaco LIMS HI-TT

Decoding and Testing

LIMS Handover Interface-Test Tool is an additional software utility for the Utimaco Lawful Interception Management System. It provides a valuable tool that allows LIMS system administrators to verify the correct syntax and content of IRI messages and HI-1 notifications, received over standards-based HI-1 and HI-2 interfaces. Also, H_3 data can be recorded for further analysis. For instance you can convert VoIP audio calls to *.wav files and play back single or duplex calls. Recorded voice-over-IP calls can be converted to *.wav files and played back.

The graphical user interface lets you browse through file system directories and select files received from network nodes or from the LIMS delivery function. LIMS HI-TT automatically detects the HI data format and displays the individual data fields in a structured and readable layout.

LIMS HI-TT is available for Windows and Linux operating systems.

Features

- Full decoding of IRI and HI-1 notification messages
- Testing of CC (FTP, TCP, UDP)
- Convert and play back audio (VoIP)
- Automatic detection of data formats
- Standards compliant
 - ETSI TS 101 671
 - ETSI TS 102 232-2/3/5
 - 3GPP TS 33.108
 - plus various vendor specific formats
- Export to readable text files
- Runs on Windows XP, 7, 8, 10 and Linux 4.0 or higher
- Minimal hardware requirements (Pentium 4, 512MB RAM, 200 MB disk)

Benefits

- Detailed verification of intercept results
- Easy to use

Since 1994 Utimaco has been developing lawful interception and data retention systems for telecom operators and Internet service providers. Utimaco's carrier-grade systems enable real-time monitoring and long term data retention in public telecommunication networks. The systems interface with essentially all common network technologies and communications services. Utimaco is the preferred partner of many of the world's leading network equipment vendors. With around 300 installations in over 90 countries, Utimaco is a leading global supplier in the Lawful Interception and Data Retention market. Utimaco participates in LI standardization and supports international standardization institutes and industry associations, such as, ETSI, 3GPP, ANSI/ATIS and Bitkom.

Customers and partners value the reliability and long-term investment security of the Utimaco security solutions. Utimaco stands for recognized product quality, user-friendly software, excellent support, and products that effectively meet market requirements.
